Our Mission

Our Mission is simple – to bring you the best Moissanite for everyone to enjoy.

What makes our Moissanite so special is our pristine Moissanite rough and its cut.

We have perfected the cut so you can enjoy the beauty of Moissanite.

We call this our Stellar cut.

The result? Breath-taking beauty and extraordinary brilliance that is unmatched by any other jewel.

This is SUPERNOVA Moissanite.

Now Everyone Can Shine
Better Color
Brighter white

The new-generation SUPERNOVA Moissanite is whiter and is true colorless (DEF), without the undesired blue color tint found in other colorless Moissanite. Consumers prefer the natural look of the SUPERNOVA Moissanite.
We have perfected our Stellar cut, to reduce the double refraction, or ‘disco-ball effect’, giving SUPERNOVA Moissanite a brilliant and natural look.

**LOW PERFORMANCE MOISSANITE**
This shows a poorly cut Moissanite. The light enters the stone and leaks out the bottom, resulting in a dull and lifeless jewel.

**SUPERNOVA MOISSANITE**
This shows our SUPERNOVA Moissanite is cut for brilliance. The light enters the top of the jewel and is refracted back up to the viewer.
Unrivaled Beauty

Moissanite has unrivaled brilliance, fire and luster, qualities that define the beauty of a jewel, at a fraction of the cost.
Incredible Value

SUPERNOVA Moissanite is the most desirable Moissanite available, embraced by women around the world.

SUPERNOVA Moissanite offers immense value and huge savings giving consumers more choices to create their dream jewelry. With these savings you truly can have it all.
